- Not have information for some records
  - Some users did not answer the question
  - Question not applicable to a particular user
- Information did not get recorded
  - Machine malfunction
- Many other reasons for missing values

# Handling Missing Data

- Two options for dealing with missing data
  - Filling in the missing values
    - Can be a preferred method in many cases
    - Doesn't mean you invent a value!
  - Delete the records altogether
    - Necessary to do sometimes
    - Be careful

# Handling Missing Data

Transaction ID	Customer ID	Product ID	Purchase Date	Customer Name	Location
53666	34987	453	01-02-2025	Priya	Patna
54333	35671	984	12-01-2025	Rahul	
56473	39823	382	29-01-2025	Divesh	Bhopal
56234	36005	226	05-01-2025	Neha	Pune

Can replace missing values with an indicator for missingness and carry on analysis

Transaction ID	Customer ID	Product ID	Purchase Date	Customer Name	Location
53666	34987	453	01-02-2025	Priya	Patna
54333	35671	984	12-01-2025	Rahul	NA
56473	39823	382	29-01-2025	Divesh	Bhopal
56234	36005	226	05-01-2025	Neha	Pune

# Handling Missing Data

- Delete entire observations
  - When crucial information is missing e.g. the information you want to analyze, some unique identifier
  - Could potentially bias the data and lead you to draw the wrong conclusions, E.g. suppose data from a particular store have missing values
